

EUR21_18 - COMPETENCY MANAGEMENT FOR EXPLOSIVE ATMOSPHERE FROM AN EPC POINT OF VIEW

Author: Philippe Angays (Technip Energies)

Abstract - Managing explosion risk in our industry is a must have. It is not a question of choosing the right equipment for a given risk, but also to deeply understand the context in order to mitigate all possible risks.

This paper will present the organisation put in place in an EPC company to cover both the competency management along the complete supply chain and the procedures attached in order to control the job down to the establishment of the Ex register and the verification dossier required by IEC 60079 - 14
